

Notes: Please read these before completing the Grant Application Form.

1. Applicants need to be aged over 16 and normally resident in the Stirling and Falkirk Council areas. A beneficiary who is related to the grant applicant may be younger than 16 years.
2. The Trustees seek to give grants which will improve the quality of life for individuals from any age group who are disadvantaged by social or educational need or disability and who are identified by a carer, minister, or social / community education worker. A grant might be used to purchase a piece of equipment, to enable someone to attend a training course or complete a creative project, or to pay for a carer to accompany someone on holiday.
3. Please note the Society does not give individual grants for:
 - Medical treatment or medical research;
 - Deficit funding or repayment of loans;
 - Retrospective funding;
 - Projects unable to start within 12 months;
 - Distribution to third party organisations;
 - General appeals and endowment funds; or
 - The relief of statutory responsibilities.
4. The Society does not give grants to public bodies and local authorities. However, the Trustees will consider making a grant to an individual in response to an application endorsed by a local authority intermediary, such as a social or community education worker acting as a referee.
5. The Society's Trustees reserve the right to ask for a statement of financial need relating to the applicant or his/her own family.
6. The Trustees reserve the right not to disclose their reasons for supporting or refusing an individual application, and to amend the Society's grants guidelines at any time
7. The Trustees meet in February, May, August and November, but may consider an urgent grant application between meetings. Please contact the Secretary for any further information about the urgent application procedure.
8. The limited amount of money available to the Trustees for grants in any given year is directly dependent on the continuing support of the Sons of the Rock Society's members and any surplus funds generated from the special events which the Society holds in the Stirling and Falkirk areas.
9. In order to raise public awareness of our work, we may publish stories about successful grant applications. No details are given which might identify applicants. Unless we hear to the contrary, we will presume the applicant has no objection to our doing so.

Revised January 2019.
